Responder Enterprise®: Powering Smarter, Connected Care

The Clinical Communication Platform Built for the Future

The accelerating pace of healthcare innovation is redefining how care teams collaborate, communicate, and deliver patient-centered care. Responder® 5 laid the foundation. Responder Enterprise builds on that legacy—offering expanded capabilities, deeper integrations, and enhanced security to meet the evolving needs of modern healthcare. Responder was built for clinicians to streamline communication and helps teams deliver care with greater efficiency and confidence.

Why Upgrade Now?

Upgrading to Responder Enterprise builds on your current Responder 5 investment by gaining access to new features such as enhanced security, standardized workflows, and actionable analytics for immediate value. This ensures you leverage the full potential of Responder, while staying aligned with the latest innovations and positioning your organization for future advancements.

Built to Elevate Clinical Workflows

Responder software enhances the clinician experience with smarter communication, streamlined workflows, and modern tools that support better care delivery.

Unified Platform & Smart Integration

- **EHR Staff Assignment Integration**
  Automate staff-to-patient assignments to reduce manual tasks and improve accuracy.

- **System Connectivity**
  A unifying platform that brings together disparate technologies using industry-standard protocols.

Mobility & Visibility

- **Status Boards**
  Deliver real-time visibility into patient activity, staff assignments, and care team locations.

Secure and Scalable

Responder's modern architecture ensures enterprise-grade security and reliability while streamlining infrastructure—supporting strategic growth with minimal operational burden.

Seamless Interoperability Across Your Ecosystem

Responder integrates with smart beds, EHRs, RTLS, Virtual Nursing, and mobile devices. The Rauland Vendor Integration Partner (VIP) Program ensures consistent, supported connections between systems.

Emergency Communication Integration

Add Telecenter® functionality for unified overhead paging of code and urgent calls to enable immediate, coordinated emergency response.

Move Forward with Confidence

Responder delivers enhanced care coordination, streamlined workflows, and actionable insights, empowering your teams and optimizing operations.
